

A multi-acid, multi-enzyme peeling solution suitable for all skin types and issues. Minimal irritation, almost no downtime, and fabulous corrective action. An amazing Fusion of exfoliating agents that produce a Fusion of skin benefits.

#### **INSTRUCTIONS - New to peels, sensitive skin, & younger users:**

It is recommended that only one layer of peel solution be used per treatment. Cleanse with a gel type face wash (we recommend MedPeel's Pre-Peel Cleanser) and gently pat skin dry. Using the gauze pads provided, dispense the peel solution evenly to the area to be treated.

We recommend a full facial application. After 4-6 minutes, rinse thoroughly from the skin and follow with your normal skin care regimen (we recommend MedPeel's treatment serums and moisturizers). Processing time for the peel can be gradually increased up to 10 minutes or a second layer can be applied for more aggressive results.

#### **INSTRUCTIONS - Experienced peel users, mature skin, and stubborn discoloration:**

It is recommended that your initial application be kept at one layer with a processing time of 4-8 minutes. Cleanse with a gel type face wash we recommend MedPeel's Pre-Peel Cleanser) and gently pat skin dry. Using the gauze pads provided, dispense the peel solution evenly to the area to be treated. We recommend a full facial application. Fusion Peel can be layered up to 3 coats with a total processing time of 15 minutes. Due to its texture, Fusion Peel can also be massaged once the final layer has been applied. This action stimulates the skin circulatory network and increases the absorption of the peel. To do this, simply wait until the peel becomes slightly tacky and press the palms of the hands to the face and gently pull away. This action can be done for up to one minute. Upon completion of the peel, rinse thoroughly from the skin and follow with your normal skin care regimen (we recommend MedPeel's treatment serums and moisturizers).

**Caution:** When proper application is used and directions adhered to, risks are minimal. This peel contains salicylic (aspirin) and fruit enzymes (pineapple, papaya, pumpkin).

**Sunburn Alert:** This product contains an alpha hydroxy acid (AHA) that may increase your skin's sensitivity to the sun and the possibility of sunburn. Use a sunscreen, wear protective clothing, and limit sun exposure while using this product.

# FUSIONPEEL

**Clears** acne conditions

**Reduces** age spots,  
melasma, discoloration
